

ARTIFICIAL AIRWAYS

Endotracheal tube -

Size - Male vs. Female

CM @ Teeth (21-23M, 19-21F)

Anatomy

Cuff management

Troubleshooting

Tracheostomy Tube -

Cuffed vs. Uncuffed

Fenestrated vs. Non-fenestrated

Bivona

Jackson

Inner cannula

Obturator

Speaking valve

Nasopharyngeal (NPA)

Oropharyngeal (OPA)

Laryngeal mask airway

King / Combitube airway

Double lumen ETT

SUCTIONING

Indications

Remove retained secretions

Maintain patency of airway

Obtain sputum sample

Hazards

Hypoxemia

Atelectasis

Cardiac arrhythmias

Hypotension

Tissue trauma

Procedure Details

Pre-oxygenate

Catheter size

Vacuum pressure

Time

Sterile technique
