

# THERAPEUTICS

## AEROSOLIZED MEDICATION THERAPY

**Small volume nebulizer -**

**Vibrating mesh nebulizer-**

**MDI -**

**DPI -**

# **HYPERINFLATION THERAPY**

**IS**

**IPPB**

**METANEB**

## **SECRETION CLEARANCE THERAPY**

**CPT**

**HFCWO**

**IPV (ALSO PART OF METANEB)**

**PEP**

**FLUTTER (ACAPELLA / AEROBIKA)**

## **SECRETION CLEARANCE THERAPY**

**Supine - anterior segments of upper lobes.**

**Prone - superior and posterior of lower lobes**

**Trendelenburg - basal segments of lower lobes**

**Bad lung goes up, good lung goes down to promote secretion drainage.**

**Remember that good lung down also improves V/Q ratio, thus improving oxygenation and ventilation.**
